## PROFILE

I am a French React.js developer seeking professional opportunities after having studied software development and a one-year working experience on React.js. I am used to React/JavaScript/HTML/CSS good practices, and working as part of a team. I got familiar with the Agile methodology by creating websites for individuals as a freelancer. I am a sociable person, passionate about traveling to uncommon places, I have a taste for exploration and discovering new things, and I am willing to settle down in another country.

---

## EMPLOYMENT HISTORY

Nov 2021 — Nov 2022

### React developer, Filiatech

Paris

I created a web React application that displays companies and their details from an API. CompanyRater uses several advanced features: tags, search bar, a sort menu, pagination, and auto-completion. The challenge was to create these features from scratch and make all of them work smoothly together

---

## INTERNSHIPS

Nov 2020 — Feb 2022

### Nextcloud 17 and Talend developer, Ministère de l'Intérieur

Issy-les-Moulineaux

My internship was first oriented on creating a Nextcloud 17 plug-in, mostly using PHP. I also created and administrated the Nextcloud server that I had to use to work on this project. I also worked on the management of a Talend platform, this job mostly consisted in orienting the data transiting through the platform.

---

## EDUCATION

Oct 2020 — Oct 2022

### Front-end Engineer, Openclassroom

Paris

Front-end development formation specialized in JavaScript and React. I created advanced applications using vanilla JavaScript at first, then React. The projects, being for example managing a bank app user account system or an Airbnb mock-up, can all be seen on my GitHub.

Sep 2019 — Oct 2020

### Devops Engineer, Ecole des technologies numeriques appliquees

Paris

My first year learning software engineering, during which I was introduced to several technologies and IT jobs. It was after this year I chose to specialize in front-end development.

## EXTRA-CURRICULAR ACTIVITIES

Nov 2021 — Present

### Website creation, Free-lance

I create websites for individuals, using WordPress. Up until now, I have created the following websites: <https://ashana-b.com> , and <https://lagrif.fr> , in self-management using the Agile methodology.

May 2017 — Aug 2019

### E-commerce shop managing, free-lance

Paris

Before learning development, I had an entrepreneurship experience consisting in creating and managing an online shop of men fashion accessories, using Shopify.
